

GOVERNMENT OF THE DISTRICT OF COLUMBIA  
DEPARTMENT OF TRANSPORTATION

**d.** Policy, Planning and Sustainability Administration

August 23, 2013

Sara Green  
Chair, Advisory Neighborhood Commission 4B  
6856 Eastern Avenue, NW #316  
Washington, DC 20012

Dear Commissioner Green,

DDOT will soon be placing a new Capital Bikeshare station in your neighborhood as part of a citywide expansion of bikesharing in the District.

We are proposing to install the station at the intersection of Cedar Street and the metro station bus entrance where there are 16 existing bike racks. (The existing racks will be relocated nearby). This location allows the best access for cyclists and for the Capital Bikeshare service vehicle. We are working with WMATA on this installation to make sure transit station operations are not hindered.

This station will work well with new stations planned for Takoma Park and Silver Spring by our new Capital Bikeshare partners in Montgomery County, as well as with other stations throughout the District.

This bikeshare station will be about 50 feet long and hold up to 19 bikes. Bikesharing stations are solar powered and use wireless technology to allow for easy installation and adjustments. Because there is no excavation or construction involved, the installation of the bikesharing station is fairly quick and easy. It only takes a couple hours for each station.

We plan to install this station late September or October, pending a WMATA permit. If you have any questions or comments, please contact me or Kim Lucas, DDOT's bikeshare project manager at [Kimberly.lucas@dc.gov](mailto:Kimberly.lucas@dc.gov) or (202) 671-0534.

Sincerely,

Jim Sebastian  
Supervisory Transportation Planner
